Coffee, for many, is not just a beverage. It is an elixir that rejuvenates the mind, body and soul.

Naturally, to create this experience is an endeavour that requires special effort, and of course, the right bean. For us, coffee is not just a commodity, it is a way of life. We have dedicated ourselves to specialising in premium differentiated coffees to create the perfect brew for discerning consumers around the world.
Managing Director and CEO’s Message

Dear Shareholders,

I am delighted to introduce the theme of this Annual Report – ‘Premium Differentiated Coffees in Tata Coffee’.

Our Company produces and markets a bouquet of Premium Differentiated Coffees – like Estate specific, Washed Arabica and Robusta, Specialty, Monsooned and Certified. We are uniquely positioned as one of the leading integrated coffee companies. The entire process of growing, picking, pulping, washing, fermenting, drying and milling is handled by our Company with the utmost care and precision.

The world of coffee has seen a definitive move towards Premium Differentiated Coffees over the last few years. This has been driven by an increasingly sensitive consumer expecting sustainable practices and seeking discerning taste profiles which have been enhanced through technological innovations in dispensing of coffees. Our Company has been anticipating this and responding rapidly. The coffee estates of
our Company are situated in the Western Ghats at different altitudes that have highly conducive micro-climates. These are some of the most beautiful coffee growing regions of the world and contribute to the romance of our Premium Differentiated Coffees. The altitude, soil and rich biodiversity enable the coffees to have their own unique visual, taste, aromatic and cupping profiles. These attributes and the care given to the plant and beans right through our stringent supply chain make us an ideal choice for roasters when they are looking for Premium Differentiated Coffees.

Our Company takes great pride in delivering these coffees to several major roasters in geographies across the world. You will read, in the pages of this Annual Report, greater details about our Company’s thrust in to the world of these coffees.

We continue to work intensely in the area of Sustainability; namely ecology, water conservation, energy use and reduction of carbon emissions. You will, through these pages, get a glimpse of our Company’s deep and abiding commitment to the same. At the root of these initiatives is a recognition that the future of our Company lies in the excellence of its products, its financial performance and quality of its social and environmental bottomline. By living in harmony with our environment and society, we create long-term value and happiness for our stakeholders. Our customers across the world also recognize and value the fact that the coffee, tea and pepper we market to them are products of a responsible business entity that is committed to these principles.

Our coffee estates are certified to the highest standards of sustainability – “Utz”, “Rainforest Alliance” and “SA 8000” – reinforcing our commitment to produce this wonderful bean in a socially and environmentally responsible manner.

---

The world of coffee has seen a definitive move towards Premium Differentiated Coffees over the last few years.

We are also very proud of the efforts we have made towards community development, through “Swastha”, a centre for special education and rehabilitation of differently-abled children of the South Coorg Region. Conceived under the aegis of the Coorg Foundation, Swastha passionately pursues the objective of integrating these students into the mainstream of society through education and skills training. This is a mark of our continued commitment to the Coorg region, which is the home of our Company.

I am sure you are proud and excited, as much as we are, as your Company continues to be successful and profitable in its journey with the Coffee Bean. It was Cherise Sinclair who wrote in the Master of the Mountain – “No matter what historians claimed, BC really stood for Before Coffee”.

With my best wishes,

Sanjiv Sarin
Managing Director and CEO
THE WAVES OF COFFEE

Coffee is the second largest traded commodity in the world. As an inseparable symbol of global culture, it is the world’s most preferred beverage. The product is consumed in a variety of forms such as roast and ground, soluble and instant mixes. It also comprises a variety of formats like pod; capsules in ‘in-home’ dispensing machines; traditional, prepared at home; espressos; those prepared by office vending machines and others that are sold at popular baristas.

The coffee odyssey or, as it is popularly known, the ‘Waves of Coffee’ started over a century ago with the First Wave in the 1900s. Consumers were introduced to the idea of consuming coffee on a mass scale. This rapidly increasing demand facilitated by the expansion of the international commodity trade in the 1900s, helped to bring coffees from across the world to consumers in the industrialised countries.

The Second Wave started out in the 1970s. This sought to capitalise on the development of consumer taste profiles and expand choices for them. Attractive branding led by large Multinational Corporations enticed consumers towards developing advanced taste profiles. Efforts were primarily devoted towards increasing awareness about roasting techniques that gave different variants of coffees their unique flavour profiles. Coffee beans were processed to adhere to these mass taste profiles.

Today, we are in the ‘Third Wave of Coffee’, the age of ‘Premium Differentiated Coffees’. This is triggered by roasters who aspire to create distinct coffee consuming experience. To make this happen, roasters select quality beans, adopt niche roasting techniques, innovative blending and state-of-the-art dispensing means. All of these have made the brew move closer to the consumer than ever before.

At Tata Coffee, developing Premium Differentiated Coffees is a passion. We partner discerning roasters all over the world, enabling them to bring alive the consumer experience.

“Around the world, people are interested in coffee like never before – where it comes from, how different roasting and brewing techniques create nuanced flavors and the artistry and craft that goes into a perfect cup.”

Integration across the value chain  
At Tata Coffee, the entire value chain of picking, pulping, washing, fermenting, drying, milling and reaching the customer is ensured with meticulous care. So much so that, even at the end of their journey across the globe, the beans still retain the distinct romance of our idyllic estates, while catering to the highest standards of quality and aroma.

Premium Differentiated Coffees  
Our Premium Differentiated Coffees come from our own estates, spread across the Western Ghats, in some of the most beautiful coffee growing regions of the world known for their rich bio-diversity which we carefully preserve. The altitude, climate and soil of the regions, coupled with our expertise, lend our products their unique allure.

Our coffee beans travel from our verdant estates in Southern India to delight our customers around the world. We delight through differentiation.
Differentiation is in our sustainable farm practices

Our cultivation practices conform to globally accepted, best standards of sustainability. It is our constant endeavour to use eco-friendly technologies, work towards enriching the soil, water and biodiversity of the regions in and around our estates.

We use scientific cultivation practices based on mapping of soil nutrition and cropping patterns. Integrated pest and disease management is carried out. This ensures optimal usage of agricultural inputs. We also use unique shade management practices based on assessing light intensity that is critical to our agronomic practices. We have over one million shade trees. Our sustainable irrigation resources mitigate the vagaries of weather. We are continuously enhancing usage of renewable energy. We strive to reduce our effluent loads by utilising state-of-the-art and eco-friendly technologies. Continuous re-planting helps rejuvenate the healthy plant population. Our coffee estates, which are SA 8000 certified, ensure international labour standards.

We believe that our Premium Washed Arabica and Robusta flavours are a result of our state-of-the-art pulping stations that ensure accuracy and consistency of taste and aroma. In addition, the process of carefully calibrated sun drying that we follow at our estates makes sure that the beans are of the right texture.
At Tata Coffee, we are dedicated to the communities we operate in. In this spirit, we engage with local communities around our estates to promote a better quality of life.

We support The Coorg Foundation towards its mission to promote education and healthcare of the underprivileged.

We support The Coorg Foundation towards its mission to promote education and healthcare in the Coorg region. This foundation operates the Swastha Centre for Special Education and Rehabilitation aimed at differently-abled children to help them reintegrate into mainstream society.

Mrs. Ganga Changappa, Director of Swastha, has been felicitated with the Rajiv Gandhi Manav Seva Award 2014 by Government of India in recognition of her outstanding contribution towards child welfare. We also support the Rural India Health Project Hospital at Ammathi which provides affordable healthcare to the community.

In Anamalais, we support the developmental activities of differently-abled children through “DARE” (Developmental Activities for Rehabilitative Education).

In communities around Theni, we run the Girl Child Nutrition Programme and support Women’s Self Help Groups.
Differentiation through managing bio-diversity

At Tata Coffee, we believe that being eco-efficient is the only way forward. We have undertaken several initiatives to preserve and enhance the ecological wealth of the areas where our plantations are located. Our unique process of ‘intercropping’ – that is growing coffee along with other crops like pepper, vanilla, oranges and areca nuts amidst lush canopies of shade trees – help promote bio-diversity. This coupled with an optimal usage of valuable natural resources, have enabled us to sustain the ecological balance across our locations. With an enormous vegetative cover, we have a negative carbon footprint of about 1.71 lakh tonnes of CO₂ equivalent per annum. Our Wildlife Cell helps mitigate the Human-Elephant conflict. Our estates combined with neighbouring areas are home to about 3,049 native species of flora and 496 native species of animals, contributing to and protecting the area’s rich bio-diversity.

Our estates combined with neighbouring areas are home to about 3,049 native species of flora and 496 native species of animals.

We are also making endeavours to protect the endangered species of The Great Indian Hornbill in our estates which is their natural habitat.
Differentiation through R&D and quality assurance

Our R&D drives our innovation and advancements in sustainable practices of cultivation and manufacturing, quality assurance and better waste management. Together, these contribute towards creating superior coffees.

Our R&D laboratory at Pollibetta is recognised by the Department of Scientific and Industrial Research, Ministry of Science and Technology, Government of India, as a centre for crop research. The laboratory drives innovation in the areas of bio-control, quality testing, soil and crop nutrition, adoption of new coffee strains, pest management, bioremediation, waste management and apiculture, among others.

Our operations are supported by an independent Quality Lab, which is accredited by the Coffee Board of India. We pride ourselves in our operational processes that help establish traceability of our beans right to the estate they were picked from. Our Curing Operations are supported by an in-house Quality and Cupping Lab, which is accredited by the Coffee Board of India. This facility along with efficient traceability processes helps us select and warehouse coffees to meet ever growing customer needs.
Differentiation is in the way we care for our people

Care for our people and employees is an indispensable part of our business’ blend. We believe it has a far reaching effects on our success, and towards this end it has been our endeavour to provide them with the best facilities and opportunities.

There is a constant focus on continuous training in the field regarding safety measures.

Our manpower practices are among the best in the industry. We provide comprehensive healthcare cover to our workers through our medical facility in the Anamallai region and by partnering with RIHP in Coorg. Our estate workers are provided with hygienic accommodation facilities and we have crèches to take care of their children while they are at work.

We have internationally recognised safety practices in our Instant Coffee plants and standard practices for mitigating threats from wildlife in our plantations.

The year under review witnessed uncertain weather conditions globally impacting the Arabica coffee crops. Brazil, the world’s largest coffee producer, faced a drought which impacted their coffee harvests. Similar weather concerns in other parts of the world resulted in a sharp increase in Arabica Coffee prices through the year 2014. The price of Arabica which remained in the range of 102 to 150 cents/lb in the New York terminal during the period January to December 2013, witnessed a steep jump to 212 cents/lb in April 2014 and 222 cents/lb in October 2014. With supply concerns easing Arabica retraced to 133 cents/lb levels in March 2015.

Regarding Robusta, Vietnam the world’s largest Robusta coffee producer recorded a bumper Robusta crop which got commercialised in late 2014. The price of Robusta, which remained flat in the range of US$ 1500-1800/MT in the London Terminal till Jan 2014, started hardening from February 2014 and touched US$ 2200/MT in March 2014. On the back of a decent Vietnam crop, the Robusta price traded, witnessed a correction and settled at US$ 1729/MT by end March 2015.

OPERATIONS:
A. Plantations:
Coffee:
The Company has harvested a higher Robusta crop of 7,002 MT as against 4,781 MT in the previous year. This has been the highest Robusta production in the last 5 years. While in the case of Arabica, being a biennial off year, production has been lower at 1,594 MT as against 2,076 MT in the previous year. The Coffee harvesting operation has been completed as per schedule.

Tea:
The Company produced 6.170 Million Kgs of Made tea for the Financial Year 2014-15 as against 6.545 Million kgs in the previous year. The long drought followed by heavy rain and some pest attack had its impact on the tea production. During 2014-15, the Tea market witnessed an easier trend compared to 2013-14 mainly due to increased crop in Africa. This directly impacted South India Tea prices due to lower exports. South India auction prices dropped by around ₹ 15.00 per kg.

Pepper:
The Company has achieved a higher pepper production of 1150 MT for the Financial Year 2014-15 as against 368 MT in the previous year. The Company has initiated various steps to further enhance the production base of pepper in the coming years.

Curing Works:
The Company’s Curing Works at Kushalnagar, cured a total of 10,266 MT Coffee during the current year as against 11,988 MT in the previous year, due to lower crop arrivals. In addition, 327 MT of Monsoon Coffee was processed as against 306 MT in the previous year.

Plantation Trails:

Plantation Trails has also been the recipient of several awards during the year including the prestigious recognition by Trip Advisor for the “Certificate of Excellence- 2014 Winner”. 

31
B. Instant Coffee Division:
The year 2014-15 saw the Instant Coffee Division post record annual sales and production. The total sales volumes clocked were 7,677 MTs – a jump of 16% over the last Financial Year. The production for the year stood at 7,975 MTs – an increase of 15% over last fiscal. In the first full year of increased capacity available, the division did remarkably well in utilizing it to the tune of 92%. The new Freeze Dried Coffee (FDC) unit ran to full capacity during the year.

The increase in Instant Coffee sales volumes was posted despite strong headwinds in the market. The financial crisis in Russia – the largest market of soluble coffee globally – and the rapid weakening of global currencies posed strong challenges to our export oriented business. In addition, the overhang of excess capacities in Instant Coffee globally, continued to pressurize the trade margins. The geopolitical risks in some of our key markets like Ukraine and Middle East also weighed on the portfolio performance.

Market expansion remains at the core of our strategy in the Instant Coffee Business. Our portfolio has been traditionally a Russia & CIS dominated one. This year just over half of our sales came from Russia and CIS vis-a-vis an 80% share a few years ago. As a conscious move towards de-risking our model, we added 32 new customers who contributed around 20% of our total volumes. Some of the countries where we placed our soluble coffees for the first time were China, Angola, Pakistan and Mongolia.

In addition to our customer acquisitions, we also steadily continued our progress on product and packaging innovation. Our new variants of coffee mixes and customized packaging solutions enhanced our standing as an institutional marketeer.

We also marched ahead steadily on our commitment to quality excellence. Our Theni Unit received the prestigious BRC & IFS certifications allowing us to service top most manufacturers and retailers, especially in Europe. Additionally, Theni factory also received ISO 14001, Halal & Kosher certifications while our Toopran Unit has been certified for ISO 14001 and 18000.

In the past year we have added to our certification portfolio and are now FSSC 22000 certified (Food Safety System Certification). This forms a part of our integrated management system which now includes ISO 9001:2008 (Quality Management System), ISO 22000:2005 (Food Safety Management System) and ISO 14001:2004 (Environment Management System)

11. **The key parameters for any variable components of remuneration availed by the Directors:**

The variable component of Non-Executive Directors’ remuneration consists of commission. In terms of the Shareholders’ approval obtained at the Annual General Meeting held on 21st July, 2014, commission is paid at a rate not exceeding 1% per annum of the profits of the Company, computed in accordance with the provisions of the Companies Act, 2013. The distribution of commission among the Non-Executive Directors is recommended by the Nomination and Remuneration Committee and approved by the Board. The commission is distributed on the basis of their attendance and contribution at the Board and Committee Meetings as well as guidance provided to senior management other than at meetings.

The Company pays remuneration by way of Commission as variable component to the Managing Director and Executive Directors. Commission is calculated with reference to the net profits of the Company in a particular Financial Year and is determined by the Board of Directors at the end of the Financial Year, based on the recommendations of the Nomination and Remuneration Committee, subject to the overall ceilings stipulated in the Companies Act, 2013. Specific amount payable as commission is based on the performance criteria laid down by the Board, which broadly takes into account the profits earned by the Company for the year.

12. **The ratio of the remuneration of the highest paid Director to that of the employees who are not Directors but receive remuneration in excess of the highest paid Director during the year:**

The highest paid Director is the Managing Director. No employee has received remuneration in excess of the Managing Director during the year.

13. **Affirmation that the remuneration is as per the Remuneration Policy of the Company:**

It is affirmed that the remuneration paid is as per the Remuneration Policy for Directors, Key Managerial Personnel and other employees, adopted by the Company.

Management Discussion & Analysis

A. INDUSTRY STRUCTURE AND DEVELOPMENTS:

The global production for the year 2014 is estimated at 142 million bags and consumption at 149 million bags. As per International Coffee Organisation (ICO) estimates, the total consumption grew at the rate of 1.5% in the year 2014. Brazil, the world’s largest coffee producer country faced a severe drought and effects were reflected in their coffee’s outputs. Similar concerns were faced in other parts of the world resulting in sharp increase of Arabica Coffee price in the second quarter of 2014-15. However, Vietnam who are one of the biggest producers of Robusta coffee recorded a bumper coffee crop. The escalation of the Robusta price was therefore comparatively less.

The consumption in the exporting countries continues to increase significantly. The total consumption grew at the rate of 2.7% in the year 2014-15. The domestic coffee consumption has also been growing steadily over the years.

In the domestic scenario, there has been an increase in the production of Robusta Coffee and pepper for the Financial Year 2014-15 and in the case of Arabica, which has witnessed lower production being a biennial off year.

The market for certified coffee continues to grow at a good rate. The market condition was challenging during the year under review for Instant Coffee due to a dip in Russian market volumes due to their economic conditions and margins were under severe pressure. To maintain volumes, the Company has embarked upon dynamic marketing strategies and has made successful forays into African and Mid East markets; it is confident of posting better sales volumes in the coming years.

The global soluble coffee market in developing countries is estimated to grow at around 3% and the market size is around 7,70,000 Metric Tonnes. Much of the projected growth is expected to be from the emerging Asian consumers, followed by consumers in Africa and the Middle East.

Tea continues to be the most popular and widely consumed beverage in India and around the world. Its consumption continues to grow globally at around 2% annually. India, China and Sri Lanka have long dominated the world tea production. India is the second largest producer of tea and contributes to about 30% of the global tea production, which is estimated to be around 2500 M. Kgs. The Indian tea production was about 1200 M Kgs during 2014-15.

B. OPPORTUNITIES, THREATS & RISKS:

Your Company’s business is dependent on the demand and supply in the international and domestic coffee markets; this is in turn dependent on the world coffee production, stocks held by the producing countries and the economic situations prevailing in the importing countries.

The ICO has estimated the total coffee production in the exporting countries at 142 million bags during 2014 as against 147 mn bags in the previous year. India contributes close to 5 million bags or 4% of the World Coffee production.

The Arabica futures market prices witnessed wild fluctuations during the year. The prices which opened at around 175 cents/lb in April 14’, dropped to 167 cents/lb in December 14’. It continued its downward trend and touched 133 cents/lb in March 15’. The Robusta market prices which started at 2024 $/MT in April 14’ witnessed a drop to a low of 1835 $/MT in December and touched 1729 $/MT levels in March 15’.

As regards Curing Works operations, the Industry continues to face stiff competition. The Company’s Coffee Curing Unit at Kushalnagar, the oldest of its kind in the Country, has been upgraded periodically and the machinery is equipped to handle not only the in-house Curing/Processing requirement of the Company but also that of third parties and to cater to Exports/Direct sale to the ultimate user. This Unit is certified for conformity with various International Standards viz. ISO 9001:2008, SA 8000:2008, Utz Kapeh Certificate, R.A. Certificate, and Organic Coffee Processing. The continued pooling of Coffee by some of the Large and Small Growers is a testimony of the trust and confidence reposed on the Company by the Private Planters over the years.

The Company has its own well equipped R&D department for carrying out various analytical exercises for ensuring quality output. The management of effluents at the Company’s pulp house continues to get utmost importance.

White stem borer is a major threat being faced by the Arabica growers across the industry. Our Company, in addition to regular tracing and chemical control, has entered into a collaborative research with M/s. Tata Chemicals & M/s. Rallis India, to find out an eco-friendly long lasting solution for this dreaded pest. The outcome of their initial trials is encouraging and the research work is in progress.
Vagaries of nature are another threat, since the entire plantation industry is dependent on nature. Continuous heavy rainfall, long drought and high day temperature during summer months are the critical factors affecting production of plantation crops. Our Company has introduced an innovative method of rain water harvesting to improve the water table at the ground level and water storage capacity to mitigate the risk of failure of natural showers.

Shortage of skilled labour is a big challenge for the plantation industry, with the younger generation migrating to cities and towns looking for alternate employments. Our Company has been increasingly concentrating on labour saving devices and mechanization of critical cultural operations. Efforts are also being made to retain the existing work force and also attract new hands by introduction of production linked incentive system, lucrative welfare measures such as housing, medical, education, child care, reward & recognition etc.

Trespassing of wild animals such as Elephants, Tigers, Bison etc., into plantation and coming in contact with human beings is another threat. Our Company has taken all measures to prevent man-animal conflict. The Wildlife Cell functioning from Head Office has been conducting regular awareness programmes across all estates and a system is in place to pass on instant information through SMS to all concerned on the movement of wild animals in the work area. In addition, the Wildlife Cell is also actively involved in protecting the endangered and nature-friendly species such as Snakes, Birds etc., by closely liaising with the Forest Dept.

D. OUTLOOK:

We produce and market a bouquet of Premium Differentiated Coffees – like Estate Specific, Washed Arabica and Robusta, Specialty, Monsooned and Certified.

Premium Differentiated coffees are at the heart of our business strategy. They symbolise our drive towards moving away from commoditisation and closer to the consumer experience.

Our Company’s thrust towards improving quality of end produce has been a top agenda and our winning of Best Awards at the Flavour of India Fine Cup Award Cupping competition year-after-year stands testimony to our efforts in this direction. The recent addition of latest state-of-the-art Coffee processing machineries imported from Brazil and Columbia should help the Company in increasing our market share in the Specialty Coffee segment at the international markets.

Our Company’s thrust towards rainwater harvesting is focused on the creation of additional capacity to cover the entire backing irrigation for Robusta and Pepper. Presently backing irrigation to Robusta and Blossom irrigation to Arabica is also being provided to the extent possible, depending on availability of water in the tanks. Efforts are on way to further increase the capacity of irrigation tanks, so as to increase the coverage of backing irrigation to Robusta and Blossom irrigation to Arabica.

With the receipt of natural showers during March ’15, the Coffee bushes and Pepper vines are looking healthy and the crop prospects for 2015-16 appear to be normal as of now. Pepper vines are being irrigated regularly during summer months to prevent moisture stress and set-back in crop setting.

With our continued thrust on producing quality coffee and increasing the production of specialty coffee, we should be able to increase our share in international coffee market. The Company’s thrust towards community service as a good corporate citizen has been continuing.

The Instant Coffee Division will strive to hone the operational excellence and customer centricity initiatives bringing in global standards and best practices to attain sustainable growth. New product development and packaging solutions fastened with continual improvement and innovation will be the driving factors of this Division.
Quality teas will continue to sell well and command a good premium in the domestic markets. The outlook for good liquoring teas is promising and is expected to have a strong demand. The plainer teas could come under pressure, and will depend on the Crops to be seen in the year 2015-16.

IV. SIGNIFICANT ACCOUNTING POLICIES

i) Statement of Profit and Loss

a) All income and expenses are accounted on accrual basis.

b) Sales are recognised on passing of property in goods together with risks and rewards i.e. delivery as per terms of sale or on completion of auction in case of auction sale. In the case of Rosewood sale, income is recognised on completion of auction sale and confirmation of receipt of money by the auctioneer. Export incentives are estimated and accrued on completion of export sales. In the case of a subsidiary, sales are recognised when risk of loss and title have transferred to the customer, which is typically upon receipt of the product by the customer. Provisions for sales returns and other allowances are recorded based on the past experience.

c) The sale value of own timber and value added timber products are credited to revenue. Capital profits on such sale, including capital profit on value added timber products determined at estimated market value of actual timber products, are transferred to General Reserve No.II through Appropriation account.

d) Compensation received from Government/ Government Agencies/ Government Cos. for their acquisition of certain rights over the properties, are accounted for as revenue in the period in which the rights over the properties have been ceded to such Governmental Agencies.

e) Depreciation on Fixed Assets is provided over the estimated useful life of the asset, as permitted under the provisions of Schedule II to the Companies Act, 2013, based on the following method:

<table>
<thead>
<tr>
<th>Divisions</th>
<th>Method followed</th>

<tbody>
<tr>
<td>Coffee Estates and Tea Estates in Coorg and Hassan &amp; Part of Curing works</td>

</tr>
<tr>
<td>Others</td>
<td>SLM</td>
</tr>
</tbody>
</table>

Leasehold improvements are being depreciated over the lease period. Increase/decrease in value of

Fixed Assets due to Foreign exchange fluctuation is depreciated over the balance residual life of the Asset.

f) The Employee benefits are provided in accordance with the revised AS 15 and are dealt with in the following manner.

- Contribution to Provident Fund and Defined Contribution Superannuation Funds are accounted on accrual basis
- Post retirement defined benefits including gratuity, superannuation, and medical benefits for qualifying employees/whole time directors as provided by the Company are determined by the independent actuarial valuation at year end and charge recognised in the books.
- Other employee benefits are accounted for on accrual basis. Liabilities for compensated absence are determined based on independent actuarial valuation at the year end and charge is recognised in the statement of profit and loss. Short-term employee benefits are recognised on an undiscounted basis where as long-term liabilities are recognised on discounted basis.

- Transactions in foreign currency are recorded using the spot rate at the beginning of each fortnight and exchange differences resulting from settled transactions are taken in the Statement of Profit and Loss. Year end balances of monetary items are restated at the year-end exchange rates and the resultant net gain or loss is recognised in the Statement of Profit and Loss. Premium or discount on forward contracts where there are underlying assets/liability are amortised over the life of the contract. Gain or loss on hedging instruments in respect of effective portion of cash flow hedges of highly probable transactions are recognised in the hedging reserve account. The portion of the gain or loss on the hedging instruments if determined to be an ineffective cash flow hedge is recognised in the Statement of Profit and Loss.

In terms of Para 46 and 46A of AS 11 issued by The Institute of Chartered Accountants of India,
Consolidated Notes On Accounts

the exchange difference relating to long term foreign currency monetary items in so far as it relates to acquisition of depreciable capital assets are adjusted to the cost of the assets and in other cases such differences are accumulated in 'Foreign currency Monetary Item Translation Difference Account'.

The income and expenditure of overseas subsidiaries are translated at the average month-end exchange rates. Year-end balances of all assets and liabilities are translated at the year-end exchange rates. Exchange differences arising on re-translation at year-end exchange rates, of the net investment in foreign undertakings, are taken to reserves.

h) Deferred tax is recognised using the liability method, on all timing differences to the extent that it is possible that a liability or asset will crystallise. Deferred tax assets are recognised and carried forward only to the extent that there is a reasonable certainty that sufficient future taxable income will be available against which such deferred tax assets can be realised.

i) The costs incurred for obtaining financing are deferred and amortised using the effective interest method over the life of the related financing agreements and charged to interest expenses.

ii) Balance Sheet

a) Assets and Liabilities are recorded at cost to the Company.

b) Fixed Assets are stated at cost less depreciation. Interest on qualifying assets (i.e. Assets that take substantial time to be ready for intended use) is capitalized at the applicable borrowing cost on the funds used for acquiring such assets. Roll over charges and exchange differences relating to foreign currency borrowings attributable to Fixed Assets are capitalised. The Fixed assets are tested for impairment and wherever required, provision is made.

c) Investments of long-term nature are stated at cost. A provision for diminution in value is made to recognise a decline, other than temporary. Current investments are stated at lower of cost and market value.

d) Inventories are valued at cost or net realisable value whichever is lower, cost being determined on weighted average method. Wind fallen/extracted timber, Cardamom and other minor produce are valued at net realizable value. Raw Materials and Stores and Spares are valued at weighted average cost and in one Subsidiary on FIFO basis.
